

FrontEnd developer

**FERNANDO
MAURICIO**
MEDRANO MAGALLANES

Who am I?

I've had a passion for programming since I was young, whether it was building small games or experimenting with logic gates and sensors. However, it wasn't until my uncle, a senior web developer, offered to mentor me about two years ago that I discovered my love for web development. Now, I'm excited to continue growing my skills in the field and pursue a career that allows me to combine my creativity and technical abilities.

My skills

English • Spanish

React.js • Astro.js

JavaScript • CSS • HTML5 •
Responsive Web Design •
SASS • Tailwind CSS

Experience

While I don't have much formal work experience, I have gained valuable skills through personal projects and intensive learning, including proficiency in programming languages like HTML, JavaScript, TypeScript and CSS. I am eager to apply my skills and passion for web development to make meaningful contributions to the industry.

Education

CECyTEJ (College of Scientific and Technological Studies of the State of Jalisco)

Mechatronics • 2017 - 2020

It combines mechanics and electronics to create advanced systems. It's an interdisciplinary field that focuses on design and development of innovative technologies that bridge the gap between hardware and software, but when people ask me, I simply say that I know how to make robots.
